

33kV Kiosk for Karratha Airport

Project:	CPS 33kV Kiosk for Karratha Airport
Project cost:	\$240,000
Date:	February 2017 – June 2017

Avid designed, assembled and tested a 33kV kiosk for the Karratha Airport. Designed to integrate renewable energy (solar) sources at the site with conventional power supplies, the kiosk comprises integrated transformer, ring main unit (RMU), switchboard and controls for power management at the site.
